AUTHORIZED REDHAT TRAINING PARTNER

CODE   PLAN
Dev
BUILD   TEST

RELEASE   DEPLOY
Ops
MONITOR   OPERATE

DevOps is more of a mindset — the way how you take your product or app from the development stage to the production stage. So its basically a concept that is used in the application lifecycle management and makes sure that the development side and the operations side are working in sync towards what product the end user has claimed.
The DevOps is implemented in many phases with the help of several tools

FOR DEV

PLAN The development team plots out a plan keeping in Mind the objectives

CODE With the help of the Plan, the coding is started. They work with the same and different versions of the code with the help of tools like git

BUILD The code is then made executable using tools like Maven, Gradle

TEST After the code is successfully built it is test for any bugs. The most popular is Selenium

FOR OPS

DEPLOY Now it is ready for deployment and sent to the operation team

OPERATE The operation team deploys the code to a working environment, the most common tools are Ansible, Docker and Kubernetes

MONITOR After which, they are monitored, Nagios is a tool for this phase

The feedback received after these phase are sent back to the planning phase. This is what forms the core of the DevOps lifecycle.
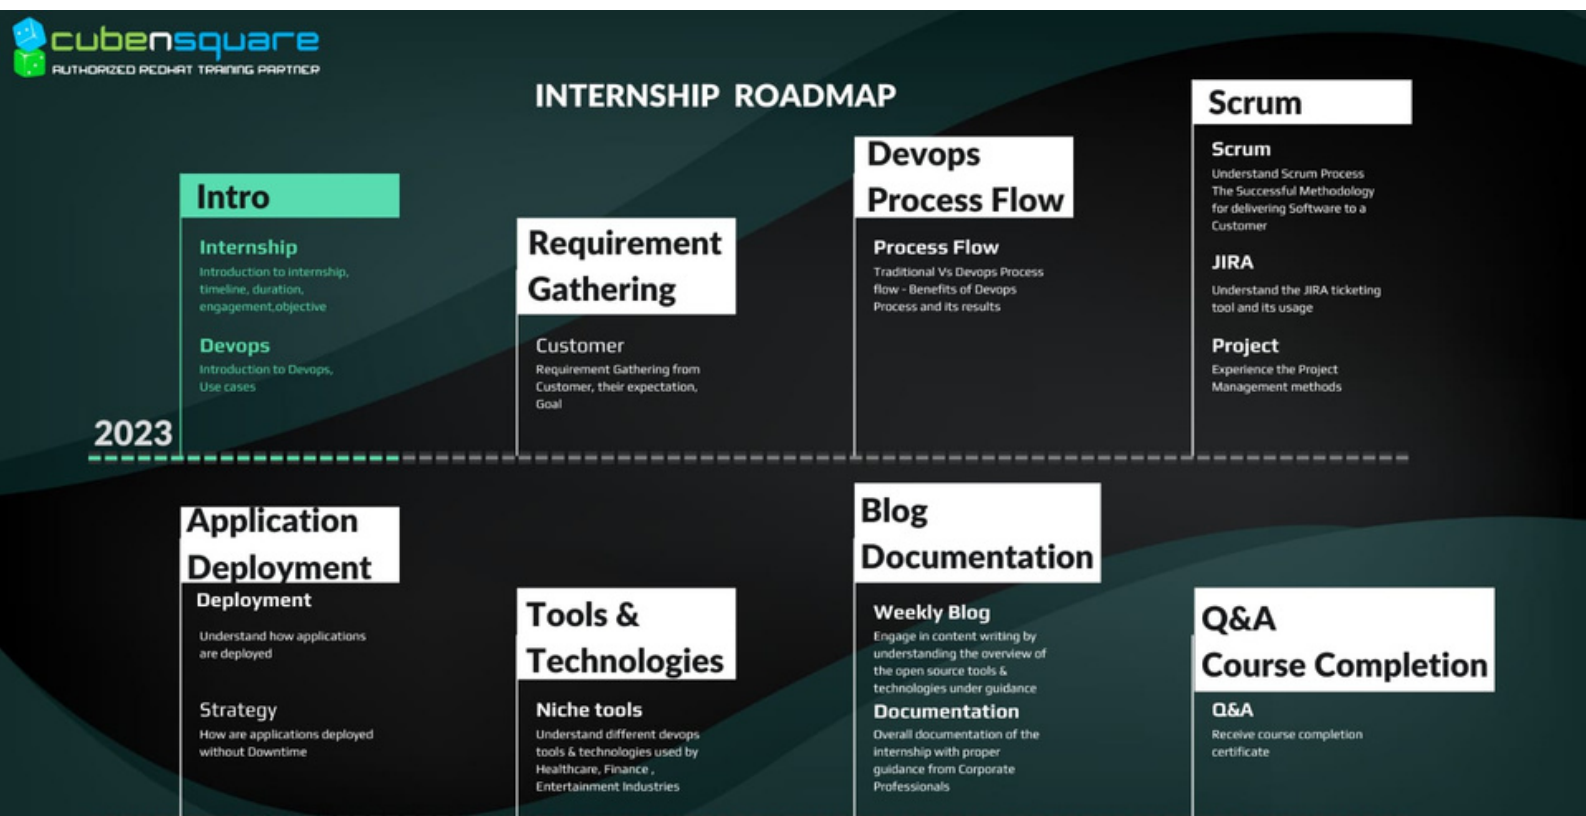

What to expect?

As an Intern, you wil be working on Impactful projects and teams to deliver the clients requirements. We are powering the project with all Linux, AWS and Devops tools.

What it's like ?

Working alongside industry experts, our interns get to learn new skills, make valuable connection and work in a real time project. We are big believers in hearing different points of views - so expect a fun filled brainstorming session.

INTERNSHIP ROADMAP

- DURATION - 60 DAYS

- MODE- ONLINE

- DAYS- MONDAY AND FRIDAY

- HOURS - 2 HRS / DAY

- ASSESSMENT- BLOG

- Q & A - TUESDAY & WEDNESDAY

Why CubenSquare ?

- Accessibility

- Prompt Service

- Clear accountability

- Reliability

- Cost effective solutions
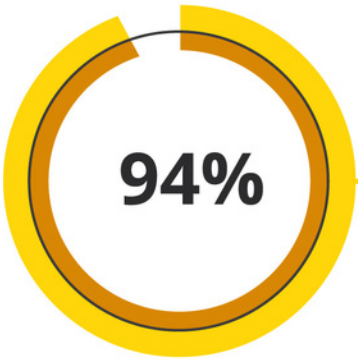

- Digital Strategy Planning

TRAINED, TESTED & TRUSTED

CubenSquare offers a diverse Curriculum of DevOps, Cloud and Automation Technologies combined with Training and Certification.

80% of IT Hiring Managers Seek Linux Talent.

"Teaching is an art and this Institute and its faculties have really achieved it. Their personalized program for IT and non-IT individuals, Knowledge, Flexibility and Interaction with students through various communication platforms are some of the great tools provided by them. What sets them apart is once you join them, you are part of their ecosystem forever which keeps evolving and allows you to do so as well. Support in job applications and real live example implementations set them apart. One can do many learning through books, e-Learning's etc, but the personal interaction is always the best and this institute deliveries it. I highly recommend you joining the institute if you are looking for career change or self development"
